CAREER OBJECTIVE

Goal-oriented Information Science undergraduate with a strong focus on Cloud, DevOps, and AI. Dedicated to applying technical knowledge in a dynamic environment to deliver quality results and grow professionally.

EDUCATION

SDM Institute of Technology, Ujire	Sept 2023 - Present
B.E. in Information Science and Engineering	
SRI BGS Science and Commerce PU College, Sringeri	May 2021 - Jun 2023
PCMC	

SKILLS

- Programming Languages:** Python, SQL, Java, C Programming
- Web Technologies:** HTML, CSS, JavaScript, Flask, RESTful APIs, Firebase
- Cloud & DevOps:** Google Cloud Platform (GCP), Docker, Cloud Run, IAM, Linux
- AI & Tools:** Generative AI, Pandas, NumPy, Git, GitHub, Hugging Face, Antigravity, VS Code

EXPERIENCE

Software Engineer Intern Benevolate, Texas, USA (Remote) 	Apr 2026 - Present
- Architecting cross-platform mobile applications using Flutter and Dart with high-performance UI rendering. - Streamlining real-time data flow by integrating complex RESTful APIs and managing asynchronous state.	
Data Science Trainee Infosys Springboard: Pragati - Path to Future (Remote) 	Apr 2025 - Jul 2025
- Executed Exploratory Data Analysis (EDA) and data preprocessing on large datasets using Python (Pandas, NumPy) and SQL to ensure data integrity and feature accuracy. - Engineered and optimized Machine Learning models using Scikit-learn (Regression, Decision Trees, Clustering) and visualized actionable insights with Matplotlib and Seaborn.	

PROJECTS

Nivarya Setu Advanced Indian Stock Market Simulator	Dec 2025
- Developed a full-stack trading platform using React.js and Flask, accurately simulating real-time NSE/BSE market operations. - Integrated YFinance and TradingView APIs to render live financial charts and fetch market data with low latency. - Implemented Firebase Authentication to manage secure user sessions and simulated KYC verification workflows.	
Ed-Wise AI-Powered Learning Platform	Nov 2025
- Developed a role-based LMS using JavaScript and Firebase, implementing secure student-admin access controls. - Integrated Groq API (LLaMA 3) to deploy an AI Tutor capable of generating instant summaries and resolving doubts. - Designed a responsive, gamified user interface to track progress and enhance student engagement across devices.	
Vyimir Atmospheric Intelligence Dashboard	Jul 2025
- Engineered a weather analytics tool using Python and Open-Meteo API to display hyper-local forecast data. - Optimized rendering to sub-seconds using asynchronous API fetching for real-time visuals. - Implemented robust error handling strategies to maintain high data availability during API rate limits.	

ACHIEVEMENTS

- Google Cloud Facilitator:** Achieved Advanced Milestone in Google Cloud Arcade for consistent cloud learning.
- AquaTech Challenge:** Secured 2nd Place for demonstrating superior technical problem-solving and agility.

CERTIFICATIONS

Cloud Computing, NPTEL.	October, 2024
Cloud Computing Masterclass - Deployment to Administration	July 13, 2023
