CAREER OBJECTIVE

Goal oriented Information Science undergraduate with a strong focus on Cloud, DevOps, and AI. Dedicated to applying technical knowledge in a dynamic environment to deliver quality results and grow professionally.

EDUCATION

SDM Institute of Technology, Ujire

Sep 2023 - Present

- B.E. in Information Science and Engineering

SRI BGS Science and Commerce PU College, Sringeri

May 2021 - Jun 2023

- PCMC

SKILLS

- Programming Languages:** Python, SQL, Java, C Programming
- Web Technologies:** HTML, CSS, JavaScript, Flask, RESTful APIs, Firebase
- Cloud & DevOps:** Google Cloud Platform (GCP), Docker, Cloud Run, IAM, Linux
- AI & Tools:** Generative AI, Pandas, NumPy, Git, GitHub, Hugging Face, Antigravity, VS Code

EXPERIENCE

Software Engineer Intern | Benevolate, Texas, USA (Remote) |

Apr 2026 - Present

- Engineered scalable cross-platform mobile applications using Flutter and Dart, optimizing high-performance UI rendering and enhancing user experience.
- Streamlined real-time data synchronization by integrating complex RESTful APIs and efficiently managing asynchronous state workflows.

Data Science Trainee | Infosys Springboard: Pragati - Path to Future (Remote) |

Apr 2025 - Jul 2025

- Performed Exploratory Data Analysis (EDA) and data preprocessing on large-scale datasets using Python (Pandas, NumPy) and SQL, ensuring high data integrity.
- Developed Machine Learning models (Regression, Clustering) via Scikit-learn, visualizing insights with Matplotlib and Seaborn.

PROJECTS

GitOps Resilience Simulator | Portfolio

Jun 2026

- Architected a highly available web application and containerized the environment using Docker to ensure consistent, cross-environment deployments.
- Implemented automated CI/CD pipelines via GitHub Actions to streamline build and deployment workflows, achieving seamless, zero-downtime updates.

Viral Drop Platform

Apr 2026

- Built a dynamic full-stack web platform utilizing JavaScript, integrating robust backend services for optimized data processing and state management.
- Established continuous integration and delivery (CI/CD) pipelines using GitHub Actions, accelerating deployment cycles and minimizing manual intervention.

Nivarya Setu | Advanced Indian Stock Market Simulator

Dec 2025

- Engineered a full-stack trading simulator using React.js and Flask to accurately replicate real-time NSE/BSE market operations.
- Integrated YFinance and TradingView APIs for low-latency live chart rendering, and secured user sessions utilizing Firebase Authentication.

Ed-Wise | AI-Powered Learning Platform

Nov 2025

- Architected a role-based Learning Management System (LMS) with JavaScript and Firebase, featuring secure Role-Based Access Control (RBAC).
- Integrated Groq API (LLaMA 3) to deploy an AI-driven tutor, automating instant summarization and real-time doubt resolution to enhance engagement.

ACHIEVEMENTS

- Google Cloud Facilitator:** Achieved Advanced Milestone in Google Cloud Arcade for consistent cloud learning.
- AquaTech Challenge:** Secured 2nd Place for demonstrating superior technical problem-solving and agility.

CERTIFICATIONS

- Cloud Computing, NPTEL. Oct 2024
- Cloud Computing Masterclass - Deployment to Administration Jul 2023
